

Week 3 · Day 5 — PRD Review

Run Sheet (Virtual) · Facilitator

Companion to `labs/day-05-prd-review.md`. Facilitator-only run-of-day for the **virtual** delivery — pairing rotation, room sequence, timing. Ships in the facilitator folder of every repo (it carries no participant data).

Mini-capstone deliverable · non-AI. 5 quads, each with its own Zoom **breakout room**. **Main room = full-group only (Opening, Wrap).** The morning is a sequence of review sessions — one PRD at a time; the afternoon is parallel work.

Timeline

Order	Activity	Length
1	Opening — <i>main room</i>	15 min
2	Primary review — Sessions 1–5	150 min
3	Revisions — <i>all breakout rooms at once</i>	50 min
4	Secondary review — Sessions 1–5	60 min
5	Wrap — <i>main room</i>	15 min

1. Opening — 15 min · Main room

Whole group. Share the pairings, the rubric, and the non-AI rule.

2. Primary review — 5 sessions, one PRD at a time, in order

Each PRD gets the floor in turn, **in the author's breakout room**. The author presents; its two reviewers score and discuss. About **30 min per session**.

Session	Presenting (author)	Reviewing
1	Aurora	Basalt & Cascade
2	Basalt	Cascade & Delta
3	Cascade	Delta & Everest
4	Delta	Everest & Aurora
5	Everest	Aurora & Basalt

Each session (~30 min):

1. Author **presents** the PRD (~5 min).
2. Reviewers **score** it against the rubric (~15 min).
3. **Clarifying discussion** — reviewers give findings; author captures adopt / defer / push-back (~10 min).

Quads not in the current session wait in their own room (re-read the PRD they'll review next, or start notes).

3. Revisions — 50 min · all breakout rooms at once

Every quad works in its **own** room, revising its PRD from the feedback and updating its resolution log. Flip status to "Revised."
(All 5 in parallel.)

4. Secondary review — 5 sessions, one PRD at a time, in order

Each author presents its **revised** PRD to its secondary reviewer, who scores and signs off. About **12 min per session**, in the author's room. **Every secondary reviewer is fresh eyes** — a quad that did *not* do the primary review on that PRD.

Session	Presenting (author)	Secondary reviewer
1	Aurora	Delta
2	Basalt	Everest
3	Cascade	Aurora
4	Delta	Basalt
5	Everest	Cascade

5. Wrap — 15 min · Main room

Whole group. Each quad delivers: **approved PRD + resolution log + secondary sign-off**.

Why the morning is sequential

Each review session needs the author plus its two reviewers together — 3 of the 5 quads. Two sessions at once would need 6 quads, so only **one PRD is reviewed at a time**. Revisions (Step 3) are solo, so those run all at once.

Pairing rotation (reusable for any 5 quads)

Label the quads 1–5 in a ring. Each PRD's **primary reviewers** are the next two quads (+1, +2); its **secondary reviewer** is the third (+3) — guaranteeing the secondary never overlaps the primaries. (Rubric lives in `labs/day-05-prd-review.md` and the `friday-review-rubric` handout.)
