

Technical Product Manager - Immersive Academy

Prepared for Expeditors

Wk 1: Customer-Centric Foundations

- AI fundamentals: prompting
- Working backwards framework
- Building and validating user personas
- Identifying pain points
- Data driven problem framing

Wk 2: Strategic Design & Metrics

- Operational signals and KPIs: What are metrics and how do they differ from KPIs?
- Defining the North Star metric
- Product design and UX principles
- Using AI for strategy and research summaries (user pain points)
- Mapping customer journeys to product features

Wk 3: Requirements Engineering & Mini-Capstone

- Drafting Technical PRDs from customer requirements
- Writing granular Acceptance Criteria (AC)
- Documenting Non-functional Requirements (NFRs)
- **Mini-capstone:** PRD deliverable (non-AI)
- PRD Review: Review and revise your PRDs
 - *NOTE: Morning in reviews, afternoon in revisions and secondary reviews*

Wk4: Technical Architecture & Constraints

- Monolith versus Microservices
- System security and compliance
- Mapping high-level system components

- Targeting latency, availability, and rate limits
- Technical trade-offs and constraints

Wk 5: Technical Infrastructure & Modeling

- Database structures and data logic
- Cloud architecture and infrastructure
- Rest and SOAP API fundamentals
- High level technical modeling
- Establishing performance baseline metrics
- Monitoring performance and usage targets
- Validating AI-generated data summaries

Wk 6: Stakeholder Alignment & Negotiation

- Identifying and mapping key stakeholders
- Managing engagement for product outcomes
- Communicating technical trade-offs to non-technical partners
- AI-augmented stakeholder requirement summaries
- Negotiating product priorities and roadmaps

Wk 7: Agile Delivery & ADO Mastery

- Product delivery outcomes
- Agile Manifesto and principles for delivery
- ADO Usage
- Outcome-based planning vs. output-based tracking
- Lean delivery and value stream mapping
- Identifying and removing delivery bottlenecks

WK 8: AI Spec Development & Capstone

AI Spec development

- **Capstone project:** Real world project
- Technical logic validation and project finalization
- Final artifact presentations
