

AC Cross-Review Template

Day 2 · Activity 4 handout. Two halves: the **reviewer worksheet** (you fill this in on another triad's AC section) and the **review-resolution note** (the author triad appends this to the bottom of §6). Read the other triad's §§1–5 for context first, then their AC.

Part 1 — Reviewer worksheet (you review THEIR AC)

Rules of good reviewing:

- Don't write "this could be more specific" — **write the rewritten AC yourself.**
- A missing weird-path AC is gold. Name it.
- Cite the AC number.

THEIR AC #	FAILURE MODE (IF ANY)	PATH MISSING? (H/S/W)	IMPLICIT AC THEY DIDN'T WRITE	YOUR SUGGESTED REWRITE / ADDITION

Overall: which path is thinnest in their coverage? _____

The one AC you'd most want them to add: _____

Part 2 — Review-resolution note (AUTHOR triad appends to §6)

For every finding the reviewers raised, mark it **adopt** / **defer** / **push back** with a reason. "We already considered that" is not a resolution — write *why*.

§6 review-resolution note

Reviewing triad: <name> **Date:** <today>

Adopted (changes made)

– <reviewer finding> → <what we changed>

Deferred

– <reviewer finding> → tracked where, and why not now

Pushed back

– <reviewer finding> → our reasoning for declining

After the resolution note

Your revised §6 should hold **8–12 AC** spanning happy / sad / weird, each passing the 5-failure-mode check, with this note documenting what peer review changed.
