

Week 7 Handouts — Agile Delivery & Azure DevOps

Participant-facing handouts extracted from the Week 7 activity packets (Delivery Plan / DP build). Each is a standalone card, template, pack, prompt, or rubric — distribute (print or share) before the day and activity that uses it. Templates and cards are meant to be filled in; answer keys stay in the facilitator lab files, not here.

Design principle: these are working surfaces, not narration. Every template is fillable; every card is a reference. The Output / Outcome Sort Pack is deliberately spoiler-free — the sorting argument is the exercise.
