

# Final Presentations

Week 8 • Day 5 • Course Closure

TPM Academy

## Day 5 Objectives

- Each triad **presents** their capstone (15 + 5 Q&A)
- Cohort + instructors **score** on the rubric
- **Cohort retrospective**: surprises / keeping / retiring
- **Post-assessments** (Product Management + Data Literacy)
- **Course closure**: certificates, final round-robin

# Today's Cadence

| Clock         | Block                                                |
|---------------|------------------------------------------------------|
| 09:00 – 09:30 | Opening; presentation order; rubric review           |
| 09:30 – 10:50 | Triads 1 + 2 present                                 |
| 10:50 – 11:05 | Break                                                |
| 11:05 – 12:25 | Triads 3 + 4 present                                 |
| 12:25 – 13:25 | Lunch                                                |
| 13:25 – 14:45 | Triads 5 + 6 present                                 |
| 14:45 – 15:15 | Cohort retrospective                                 |
| 15:15 – 16:00 | Course closure: post-assessments, certificates, wrap |

# The Friday Rubric

Score on the rubric, not against other triads

# Friday Presentation Rubric

| Dimension                  | Weight |
|----------------------------|--------|
| Customer + problem clarity | 15%    |
| Integrated artifact set    | 15%    |
| AI Spec quality            | 20%    |
| Trade-off honesty          | 15%    |
| Outcome thinking           | 10%    |
| Delivery readiness         | 10%    |
| Presentation craft         | 15%    |

Score 0–4 per dimension. Final = (peer mean + instructor) / 2.

# Q&A Discipline (for presenters)

| When asked                  | Do this                                                    |
|-----------------------------|------------------------------------------------------------|
| Specific Q you can answer   | Crisp answer < 90 sec                                      |
| Specific Q you can't answer | "Honestly, I don't know — here's what we'd do to find out" |
| Challenge to a decision     | Restate decision + trade-off + revisit trigger             |
| Out-of-scope Q              | Acknowledge; reference §11 / "explicitly NOT"              |
| Hostile Q                   | Curiosity. "What concern would that address?"              |

**Curiosity, not defensiveness.** Triads who handle Q&A with curiosity score high on presentation craft.

# The Presentations

15 minutes + 5 Q&A per triad

# Presentation Slot Structure

- **15 minutes** presentation (timer enforced)
- **5 minutes** Q&A (instructors lead)

All 3 triad voices speak. Time-managed. Customer + problem grounds the rest.

## Cohort Scoring Discipline

- Score **during** the presentation, not after
- Specific notes per dimension
- **Whole-number** scores; no half-points
- Score against the **rubric**, not against other triads

**Don't grade on a curve.** If two triads score 3.5, both are 3.5.

# Cohort Retrospective

30 minutes; 3 rounds

# The 3 Retrospective Rounds

1. **What surprised you?** One thing each — content, process, yourself
2. **What muscles are you keeping?** 2 muscles each
3. **What habit are you retiring?** 1 habit each

Three artifact lists for the cohort to take with them.

# Course Closure

45 minutes

# Closure Components

1. **Post-assessments** (15 min): PM + Data Literacy — same instruments as pre-assessments
2. **Certificate distribution** (5 min)
3. **Closing words from instructors** (10 min)
4. **Final round-robin** (15 min): one sentence each on what the academy gave them

## Materials You Take With You

- **Artifact templates** (PRD/TCD/TMD/SEP/DP/AI Spec) for use in your next role
- **Pattern Library** — cumulative across Weeks 2–8
- **"Next 90 days" reading list** — 3–5 books / podcasts / talks
- **Cohort connections** for ongoing support

# The 5 Muscles of the Academy

## **Customer-centric**

(Wk 1) Personas,  
pain points, problem  
framing

## **Strategic + measurable**

(Wk 2) NS, Tier  
Sheet, journey,  
design principles

## **Engineering- readable**

(Wk 3 + 8) PRDs,  
AC, NFRs, AI Spec

## **Architecturally aware**

(Wk 4 + 5) TCD,  
TMD, trade-offs,  
SLOs, sequences

## **Stakeholder-fluent**

(Wk 6) Mapping,  
engagement,  
negotiation

## **Delivery- disciplined**

(Wk 7) ADO,  
outcome tracking,  
VSM, bottlenecks

# Congratulations, TPM Academy Cohort

You shipped 5 sibling artifacts + an AI Spec + a  
capstone.

Take the muscles. Use the templates. Keep the discipline.

# Final Round-Robin

One sentence: what did the academy give you?
