

Persona Validation Canvas

Day 3 · Activity 2 template. One canvas per quad (A3 recommended if printed). Fill Boxes 1–4 from what you know, pull Box 5 from the Research Packet, brainstorm Box 6. **Tag every claim with an evidence tier**, then circle the **3 claims you'd most want to validate with a real dispatcher**.

Evidence tiers: **Observed** › **Reported** › **Inferred** › **AI-generated** (lowest). AI-generated claims may *seed* a box but must move to a higher tier before Friday's readout.

Persona handle (behavior-based, not a name):

1 · Role & context

Claim	Tier

2 · Goals (in their words)

Claim (quote)	Tier + source
'''	
'''	

3 · Current behavior (observed)

Claim	Tier + source

4 · Constraints (physical / organizational / cognitive)

Claim	Tier

5 · Pain points — *verb + circumstance + consequence*
(aim for 5+)

"[role] [verb] because [circumstance], which causes [consequence]"	Tier + source

6 · Assumptions to validate

Claim	Tier (usually Inferred / AI-generated)

3 validation targets circled: ① _____
② _____ ③ _____
