

Day 4 — Mini-Capstone: PRD Assembly (Non-AI) · Facilitator Guide

Companion to `labs/day-04-prd-mini-capstone.md`.
Facilitator-only — do not hand to participants.

Activity 1 — Section 8: Metrics & Validation

Cues:

- "We'll watch a few things" is the rookie tell — force the single primary metric.
- If the counter-metric drifted from Week 2 Day 2, ask why. Inconsistency means one of the two is wrong.

Activity 2 — Section 9: Risks & Open Questions

Cues:

- "No risks" is a fail. Push.
- Risks without mitigations are wishlist items. Force the mitigation column.
- Watch for a quad assigning "TBD" as owner — that's the unowned risk that slips. Force a name.

Activity 3 — Sections 10 & 11: Dependencies + Out-of-Scope Follow-ups

Cues:

- "TBD" as a dependency owner is the tell of an unowned dependency that will ship late. Force a name.
- Out-of-scope items written as "future work" or "v2" are unactionable; push for specifics with ticket placeholders.

Activity 4 — Integration Pass + Lock

Cues:

- Watch for quads who spend 60 minutes polishing prose. Coherence first; prose last.
- Reluctance to mark a section "least sure" hides a confidence problem reviewers will surface tomorrow.

Facilitator reflection prompts (end of day)

- Which quad's PRD is the most coherent? They should be a positive Friday example.
- Which quad has the most risks-without-mitigations? Coach Friday morning before reviews start.
- Did anyone skip Section 11? Surface tomorrow — out-of-scope is the negotiation tool for Week 6.
- AI use: any last detection? Address privately before Friday.
- Friday review pairings: post on the wall by end of today.
