

Day 1 — Identifying & Mapping Key Stakeholders · Facilitator Guide

Companion to `labs/day-01-stakeholder-mapping.md` .
Facilitator-only — do not hand to participants.

Activity 1 — Build the Stakeholder List

Cues:

- If a quad's list is < 8, push: "have you thought about [circle]?" Most lists under-include compliance and finance.
- If a quad's list is > 20, ask which 5 they'd cut. Coverage isn't usefulness.

Activity 3 — RACI Assignment for Five Decisions

Cues:

- "We're all R" is a smell — it usually means responsibility is unclear. Push for specificity.
- "I'll be A" from the TPM is the most common error — TPMs often think they're A on architecture. They're usually C, with the Architect as A.
- The "is the A actually empowered" check is the most useful — many nominal A's are actually rubber stamps; the real A is upstream.

Facilitator reflection prompts (end of day)

- Which quad's grid was most rigorously argued? Hold up Friday.
- Did any quad have multiple A's? Most common discipline failure.

- Did any quad miss compliance / legal / finance? Common omissions.
- The two surprises per quad — they're the most useful insight of the day. Document them publicly.
