

Day 2 — Managing Engagement for Product Outcomes · Facilitator Guide

Companion to `labs/day-02-engagement-management.md`.
Facilitator-only — do not hand to participants.

Activity 1 — Engagement Style Calibration

Cues:

- The **at-risk Customer Success** case is the trickiest: high power (because the customer is at risk) but appears low power (a single CSM). Surface this dynamic.
- The **VP of Operations** case calibrates to "high power + medium interest" — push for the *exact* engagement: monthly written brief + escalation when triggers hit.
- The **junior PM** case calibrates to "you'll learn from them" — bidirectional asks matter.

Facilitator reflection prompts (end of day)

- Which quad's plan is most calibrated by quadrant? Hold up Friday.
- Did anyone over-invest in low-power × high-interest? Common; coach back.
- Did anyone skip high-power × low-interest engagement? Most dangerous.
- Did the cohort surface the asymmetric-asks anti-pattern? It's the most-missed.
