

Engagement Plan Template

Day 2 · Activity 2 handout. One block per stakeholder.
Capture the recurring engagement (stable month-to-month) and the "right now" asks (what changes this period). This becomes SEP Section 2.

Per-stakeholder block

```
### <Name / Role>

**Quadrant:** High-Power × Low-Interest (etc.)

**Cadence:** weekly / bi-weekly / monthly /
quarterly / trigger-based

**Format:** crisp memo / email / sync / standup
mention / newsletter

**Length:** < N words / < N min

**What they need from us (recurring):**
- ...

**What we need from them (recurring):**
- ...

**What they need from us right now (this period):**
- ...

**What we need from them right now (this period):**
- ...

**Channel of choice:** email / Slack / sync /
Confluence
**Backup channel:** ...

**Stakeholder-specific notes:**
- (preferences, sensitivities, history with similar
work)
```

The "**recurring**" rows are stable. The "**right now**" rows are what you refresh each period.

The "right now" asks — three categories

Every "right now" ask is a Decision, Information, or Action ask. Predict the reciprocal ask too — what *they* will ask of *you*.

Category	Examples
Decisions	Confirm scope; sign off on architecture stance; approve SLO targets
Information	Answer a specific question; share a doc; introduce someone
Action	Add a story to their team's backlog; schedule a review; make a call

Specific beats vague: "approve the SLO" beats "review the doc."

Engagement anti-patterns — self-diagnostic

Rate your quad H / M / L on susceptibility to each, then bake a counter-measure into the plan.

Anti-pattern	Symptom	Counter-measure
Channel sprawl	Same message via Slack DM + email + meeting	Commit to one channel of record per stakeholder
Rolling silence	Stakeholder untouched for 6 weeks; then a problem	Calendar each cadence as a recurring reminder
Surprise reveal	Major decision shared after the fact	Engage early; pre-share before the public moment
Asymmetric asks	TPM only asks; never offers	Build "what we offer" into each engagement
Veto avoidance	TPM avoids the high-power / low-interest stakeholder	Trigger-based engagement from the watch list
Email avalanche	20-page deck to a 250-word audience	Match length to audience
