

Day 1 — Product Delivery

Outcomes + Agile Manifesto & Principles · Facilitator Guide

Companion to `labs/day-01-outcomes-agile-principles.md`. Facilitator-only — do not hand to participants.

Activity 1 — Output / Outcome Sort

Cues:

- **#5 (downloads)** is the trap card. Downloads are an output that *looks like* an outcome. Push hard.
- **#12 (active dispatchers)** is the cleanest outcome — it's grounded in user behavior with a clear definition.
- **#11 (research sessions)** is a process output — done in service of outcomes but not itself one.

Answer key / watch-for (sort pack):

1. Output — a ship event.
2. Outcome — user-behavior change (time saved).
3. Output — stories delivered.
4. Outcome — NPS movement for the persona.
5. **Output (trap card)** — downloads look like an outcome but are a vanity output.
6. Outcome — abandonment-rate movement.
7. Output — a hire.
8. Outcome — time-to-first-value dropped.
9. Output — a refactor.
10. Outcome — renewal driver named by customers.
11. Output (process) — research sessions held.
12. **Outcome (cleanest)** — active dispatchers with an explicit behavioral definition.

Note: the "6 principles we de-emphasize" callout was moved out of the student reference into your discretion — cover it verbally in the wrap if the cohort asks why only 6 are highlighted.

End-of-day reflection prompts

- Which quad's primary outcome was sharpest? Hold up Friday.
- Did anyone list "ship the feature" as the primary outcome? Coach back.
- Did the Manifesto discussions stay grounded or drift to ceremony talk? Steer toward decisions, not vocabulary.
- Did anyone over-list supporting outcomes (8+)? Cull tomorrow before ADO loading.
