

Day 2 — ADO Usage (Hands-On Workshop) · Facilitator Guide

Companion to `labs/day-02-ado-usage.md` . Facilitator-only
— do not hand to participants.

Pre-flight

- ☐ Confirm every quad has access to a sandbox or live ADO project (instructor-provisioned ahead of class).
- ☐ If ADO isn't available, run today as "**ADO concepts on paper**" — same template, captured in markdown. Coverage is similar; hands-on practice is the loss.
- ☐ Quads need their PRD (especially Section 6 AC), TCD Section 5 trade-offs, TMD Section 3 API, and SEP Section 5 outcomes log. The backlog is built from these.

End-of-day reflection prompts

- Which quad's hierarchy is cleanest? Hold up Friday.
- Did anyone skip NFR stories? Coach them; NFRs are work.
- Did anyone go deeper than 4 levels? Most common discipline failure.
- Was anyone tempted to skip story points ("we don't really estimate")? Push back; estimates are a learning tool even when imperfect.
