

Day 4 — Lean Delivery & Value Stream Mapping · Facilitator Guide

Companion to `labs/day-04-lean-vsm.md` . Facilitator-only
— do not hand to participants.

Activity 2 — Measure or Estimate Each Step

Cues:

- Quads will often refuse to estimate if they don't have data. Push: "honest guess beats no number." Label as guess; calibrate over time.
- The "Measure" step's "30 days for outcome" is inherent waiting — that's not a bug. Distinguish *systemic queue* from *necessary delay*.

End-of-day reflection prompts

- Which quad's VSM is most rigorously measured? Hold up Friday.
- Did anyone refuse to estimate? Coach back; honest guesses are required.
- Did the cohort confront how low single-digit flow efficiency really is? It usually shocks people.
- Did anyone confuse "necessary delay" (e.g., 30 days for outcome data) with "queue waste"? Surface tomorrow.
