

Outcome Map Cross-Review Questions

Day 1 · Activity 4 handout. Reviewer quad: read the other quad's outcome map and press on these four questions. The goal is to surface outputs masquerading as outcomes.

You are reviewing another quad's DP Section 1 outcome map. Read it, then ask each question out loud and make them defend the answer.

The four questions

1. **Is each "outcome" actually an outcome, or is one a dressed-up output?**
 2. **Do the supporting outcomes overlap?** (Overlap is a sign of a weak output/outcome distinction.)
 3. **Is the counter-outcome specific enough to detect a real cheat?**
 4. **What outcome is missing?**
-

Cross-review protocol

1. **Pair quads** (instructor assigns).
2. **20 min cross-review** using the four questions above.
3. **15 min author-quad revisions** based on what surfaced.

AI sanity check (optional, 10 min)

Paste your revised outcome map into the following prompt and cross-check the findings against your own read:

Role: Senior PM coaching outcome thinking.

Context: <paste the outcome map>

Task: Identify where outputs are masquerading as outcomes,

where outcomes are too vague to measure, and any

counter-outcome that could be gamed.

Constraints:

- Be specific to the statements given
- Suggest a concrete rewrite

Format: 3 numbered findings.
