

# Week 8 — AI Spec Development & Capstone · Facilitator Overview

---

Facilitator-only companion to `labs/README.md`. The per-day facilitator guides are the `day-*.md` files in this folder.

## Facilitator pre-flight checklist

---

- ☐ The fully-specified Holocron reference PRD (the capstone answer key) is **not published to any mirror** — it lives in the private course repo only. Request it from the course owner if you do not have it.
- ☐ Confirm every quad has **read the Holocron problem brief** and can state the problem in one sentence by Monday morning.
- ☐ Pre-print or share digitally: **AI Spec Template** (Day 1), **Capstone Compression Card** (template references), **Validation Checklist** (Day 4), **Presentation Rubric** (Day 5).
- ☐ If any quad's subject is too thin (< a real feature) or too vague (no real customer signal), pre-coach Day 1 morning before they invest time.
- ☐ Reserve presentation room + scoring sheets for Friday.
- ☐ Coach yourself on the **most common Week 8 trap**: quads who try to redo all of Weeks 1–7 in compressed form. The discipline is **selective**: which muscles does this capstone need?

## Facilitator final reflection prompts (end of week)

---

- Which quad's artifact set was strongest? Document the pattern; share with future cohorts.
- Which Week-1–7 muscle was the cohort weakest at when stressed by the capstone? That's the highest-leverage deepening for next academy.

- Did the AI Spec Development discipline hold under pressure? Or did quads regress to "just generate it"?
- Did the post-assessments reflect the felt growth?

## Per-day facilitator guides
