

Day 4 — Technical Logic

Validation & Finalization ·

Facilitator Guide

Companion to `labs/day-04-validation-finalization.md`. Facilitator-only — do not hand to participants.

Activity 1 — The 7-Point Validation

Cues:

- Watch for quads that mark every check as "Pass" without actually walking the references. Push: "show me the section reference."

Answer key / watch-for:

- Common fail: #4 (SLO ↔ sequence). Tightening the SLO is acceptable if the sequence is the truth.

Activity 4 — Presentation Rehearsal

Cues:

- If one quad member dominates, redirect speaking time.
- If the customer + problem section drags, force a tighter open.
- The "what we'd do differently" section is often the strongest signal of the cohort's growth — coach for honesty.

Facilitator reflection prompts (end of day)

- Which quad's validation log surfaced the most issues honestly? They've internalized the discipline.
- Did anyone mark all 7 checks as "Pass" without walking references? Catch them.

- Which quad's presentation is sharpest? Not necessarily the one with the most polished delivery — the one with the cleanest narrative arc.
- Did the cohort retain the AI-validation discipline through compression? If yes, the academy worked.
