

Week 8 Handouts — AI Spec Development & Final Capstone

Participant-facing handouts for Week 8. Templates, checklists, and rubrics the daily activity packets reference — plus the Day-5 take-home wrap collateral. Distribute (print or share) before the day that uses each.

Capstone note: the Week-8 capstone subject is **Holocron** for every quad — an enterprise string-management problem supplied as a problem brief (`holocron-problem-brief.md`). Quads receive the business context and derive all requirements themselves; the fully-specified reference PRD is facilitator-only.

Handout	Introduced	What it is
ai-spec-template	Day 1	The 8-section engineering-ready AI Spec, with the section-to-source map
ai-spec-5-prompt-sequence	Day 1	The 5 validated prompts (+ validation step each) that draft the AI Spec
holocron-problem-brief	Week 7 Day 5 / Day 1	The capstone problem: business context, facts, stakeholders, constraints, open questions
capstone-scoping-questions	Day 1	5 questions to lock a defensible Holocron scope slice for a 4-day build
prd-light-template	Day 2	2-page compressed PRD (Sections 1–7) + compressed persona
tcd-light-template	Day 3	1.5-page compressed Technical Concept Document
tmd-light-template	Day 3	1.5-page compressed Technical Modeling Document
technical-logic-validation-checklist	Day 4	7-point cross-artifact consistency check + validation log
sep-light-template	Day 4	1-page compressed Stakeholder Engagement Plan
dp-light-template	Day 4	1-page compressed Delivery Plan
friday-presentation-rubric	Day 5	Scoring rubric, 15-min presentation structure, and Q&A discipline
artifact-templates-index	Day 5	Master index of every course template —

Handout	Introduced	What it is
		purpose + originating week
next-90-days-reading-list	Day 5	Curated books / podcasts / talks to keep the muscles warm
cohort-contact-sheet	Day 5	Blank opt-in contact table for staying in touch
pattern-library-scaffold	Day 5	Structure + protocol for quads to assemble their cumulative Pattern Library

Design principle: these handouts provide the *structures and disciplines* — templates, checklists, rubrics. The capstone artifacts themselves (PRD-light, TCD-light, AI Spec, etc.) are the participants' work to produce; answer keys and facilitator coaching cues stay in the activity packets, not here.
