

Friday Presentation Rubric + Q&A Discipline

Day 5 handout. How your 15-minute capstone presentation is scored, and how to handle the 5-minute Q&A. Review this before you present. Each cohort member scores every quad (peer scores); the instructor scores separately. Final = (peer mean + instructor) / 2.

The rubric

Each quad's 15-min presentation is scored **0–4 per dimension**; apply weights for a total out of 4.0. Whole-number scores only.

Dimension	Weight	Exemplary
Customer + problem clarity	15%	Engineer or stakeholder could understand the customer's pain in 90 seconds
Integrated artifact set	15%	All 6 artifacts referenced; references are consistent
AI Spec quality	20%	Engineering-ready; integrates PRD/TCD/TMD outputs; provenance log included
Trade-off honesty	15%	At least 2 trade-offs named with cost + revisit trigger
Outcome thinking	10%	NS / Tier-Sheet / leading indicator vocabulary used naturally
Delivery readiness	10%	DP-light shows backlog, tracking, one bottleneck experiment
Presentation craft	15%	All quad voices speak; time-managed; questions answered with curiosity not defensiveness

Scoring discipline (when you score peers): score *while listening*, not afterward — memory degrades. Keep specific notes per dimension. Score against the rubric, **not against other quads** — don't grade on a curve.

The 15-minute presentation structure

Time	Section	What's covered
1 min	Customer + problem	Real customer; specific friction
2 min	Outcome	Primary outcome; tied to user/business value
3 min	Architecture stance + top trade-off	Defended in business terms
3 min	Data + API + sequence highlights	Engineering-ready summary
2 min	SLO + key constraint	Latency / availability / one compliance item
2 min	Stakeholder + delivery readiness	SEP-light + DP-light highlights
2 min	What you'd do differently with more time	Honesty + reflection

Plus **5 min Q&A**. All three quad voices speak; hold the 15-min limit within 30 seconds.

Q&A discipline (for presenters)

When asked	Do this
A specific question you can answer	Answer crisply (< 90 sec)
A specific question you can't answer	"Honestly, I don't know — here's what we'd do to find out"
A challenge to a decision	Restate the decision; restate the trade-off; offer the revisit trigger
A question about something out of scope	Acknowledge; reference Section 11 / DP-light "explicitly NOT"
A hostile question	Curiosity, not defense: "What concern would that address?"

Q&A is part of the rubric (presentation craft). Quads who handle Q&A with **curiosity, not defensiveness**, score high.
