

Week 1 Handouts — FieldPulse Ambient Context

Participant-facing handouts for the Week 1 running case study (**FieldPulse**). These are the "ambient context" the Day 1 activity packet promises. Each is provided in **md** / **html** / **pdf**. Distribute (print or share) before the day that uses it.

HANDOUT	INTRODUCED	USED IN	WHAT IT IS
fieldpulse-product-overview	Day 1	All week	One-page product overview — orients every triad on the same product
customer-quote-prior-pr	Day 1	Day 2 (Working Backwards)	Composite customer quote from an earlier FieldPulse PR — a model of a grounded, in-character quote
dispatcher-interview-transcripts	Day 1	Day 3 (Personas)	Three anonymized dispatcher interviews (Maria R., Trey W., Susana O.) + two ride-along field notes
support-tickets	Day 1	Day 4 (Pain Points)	14 sanitized support tickets, from severe-and-frequent to noise
analytics-export	Day 1	Day 3 + Day 4	Section time-in-app (Day 3) + the end-of-day reconcile funnel with 65% step-4 abandonment (Day 4)

Design principle: these handouts *provide evidence, not conclusions*. They deliberately do not diagnose pains, rank problems, or propose features — surfacing and scoring those is the participants' work across the week. Characters, numbers, and product facts are kept consistent across all five so cross-referencing them (a quote against a ticket against the funnel) is a valid exercise.
