

Week 8 Handouts — AI Spec Development & Final Capstone

Participant-facing handouts for Week 8. Templates, checklists, and rubrics the daily activity packets reference — plus the Day-5 take-home wrap collateral. Distribute (print or share) before the day that uses each.

Capstone note: the Week-8 capstone subject is a **real project of the triad's own** (work, school, or hobby) — **not FieldPulse**. The templates are subject-agnostic; FieldPulse is only the Day-1 practice input for learning the AI-spec technique.

HANDOUT	INTRODUCED	WHAT IT IS
ai-spec-template	Day 1	The 8-section engineering-ready AI Spec, with the section-to-source map
ai-spec-5-prompt-sequence	Day 1	The 5 validated prompts (+ validation step each) that draft the AI Spec
capstone-fit-questions	Day 1	5 questions to confirm a capstone subject survives a 4-day build
prd-light-template	Day 2	2-page compressed PRD (§§1–7) + compressed persona
tcd-light-template	Day 3	1.5-page compressed Technical Concept Document
tmd-light-template	Day 3	1.5-page compressed Technical Modeling Document
technical-logic-validation-checklist	Day 4	7-point cross-artifact consistency check + validation log
sep-light-template	Day 4	1-page compressed Stakeholder Engagement Plan
dp-light-template	Day 4	1-page compressed Delivery Plan
friday-presentation-rubric	Day 5	Scoring rubric, 15-min presentation structure, and Q&A discipline
artifact-templates-index	Day 5	Master index of every course template — purpose + originating week
next-90-days-reading-list	Day 5	Curated books / podcasts / talks to keep the muscles warm
cohort-contact-sheet	Day 5	Blank opt-in contact table for staying in touch
pattern-library-scaffold	Day 5	Structure + protocol for triads to assemble their cumulative Pattern Library

Design principle: these handouts provide the *structures and disciplines* — templates, checklists, rubrics. The capstone artifacts themselves (PRD-light, TCD-light, AI Spec, etc.) are the participants' work to produce; answer keys and facilitator coaching cues stay in the activity packets, not here.
