

SEP-Light Template (1 page)

Day 4 handout. The compressed Stakeholder Engagement Plan — Week-6 work in ~20 minutes. Stakeholder map + one trade-off brief + one simulated negotiation. The trade-off brief must be in the **stakeholder's currency**, not technical.

SEP-light – <feature>

1. Stakeholder map (compressed)

3 high-power stakeholders. Power × Interest placement + RACI for 1 decision (the most consequential).

2. 1 Trade-off brief

1 page. Pick one TCD-light Section 5 trade-off; brief for the relevant stakeholder.

3. 1 Simulated negotiation outcome

For one of the 5-most-consequential asks, document:

- The ask
 - Anticipated stakeholder response (top 1 objection + your response)
 - Anticipated agreement / deferral / escalation path
-

Build order (20 min)

1. **5 min** — 3 stakeholders + RACI for the most consequential decision.
2. **10 min** — 1 trade-off brief (pull from TCD-light Section 5).
3. **5 min** — 1 simulated negotiation outcome.

What "good" looks like

- The trade-off brief speaks in the **stakeholder's currency** — cost, risk, timeline, customer impact — not architecture jargon.
- The RACI names a **real, consequential decision**, not a generic one.
- The simulated negotiation anticipates the **single most likely objection** and has a response ready.
