

Day 5 — Final Artifact Presentations + Course Closure · Facilitator Guide

Companion to `labs/day-05-final-presentations.md` . Facilitator-only — do not hand to participants.

Facilitator flow — today's cadence (different from prior days)

CLOCK	BLOCK	WHAT HAPPENS
09:00 – 09:30	Opening; presentation order; rubric review; final tweaks	Instructor + triads
09:30 – 10:50	Triad 1 + Triad 2 presentations (15 min + 5 min Q&A each, plus 10 min flex)	Cohort scores
10:50 – 11:05	Break	
11:05 – 12:25	Triad 3 + Triad 4 presentations	
12:25 – 13:25	Lunch	
13:25 – 14:45	Triad 5 + Triad 6 presentations	
14:45 – 15:15	Cohort retrospective	What worked; what to deepen
15:15 – 16:00	Course closure: post-assessments, certificates, wrap	Instructor-led

If the cohort is smaller, the morning compresses; if larger, presentations extend and the retrospective tightens.

Activity 1 — Final Tweaks + Presentation Order

Presentation order: The instructor sets the order at 09:00. Suggested heuristic: alternate between triads with similar capstones and triads with different ones, to avoid the "everyone presents the same thing in a row" fatigue.

Activity 2 — Presentations

What instructors do during presentations:

- Time-keep (one instructor)
- Score (other instructors)

- Note specific lines / moments to call out in the wrap
- Collect peer scores after each presentation

Activity 3 — Cohort Retrospective

Facilitation: Three rounds, each 7–10 minutes. The instructor captures themes (especially in Round 1). Output is three artifact lists (surprises / keeping / retiring) the cohort takes with them.

Activity 4 — Course Closure

Facilitation: The final round-robin is the closure ritual — brief, public, and important. Instructors model it first.

Facilitator final reflection prompts

- Which triad's presentation was the strongest synthesis? Document for next cohort.
- Which Week-1–7 muscle was the cohort weakest at when stressed by the capstone? That's the highest-leverage deepening for next academy.
- Did the AI Spec discipline hold under capstone pressure? If yes, the academy worked.
- Did the post-assessments reflect the felt growth?
- What would you change about the Week-8 cadence in particular?
- What signals tell you a cohort member is going to thrive in their next TPM role? (Note them — useful for hiring conversations.)
