

Week 1 Handouts — Customer-Centric Foundations

Participant-facing handouts for Week 1, built on the running case study (**FieldPulse**). Distribute (print or share) before the day and activity that uses it. Templates and cards are meant to be filled in; the facilitator answer keys stay in the lab files, not here.

Ambient context (given Day 1, referenced all week)

The "ambient context" the Day 1 activity packet promises — evidence, not conclusions.

Handout	Used in	What it is
fieldpulse-product-overview	All week	One-page product overview — orients every triad on the same product
customer-quote-prior-pr	Day 2	Composite customer quote from an earlier PR — a model grounded, in-character quote
dispatcher-interview-transcripts	Day 3, Day 4	Three anonymized dispatcher interviews (Maria R. / Trey W. / Susana O.)
support-tickets	Day 4	14 sanitized support tickets, from severe-and-frequent to noise
analytics-export	Day 3, Day 4	Section time-in-app + the end-of-day reconcile funnel (65% step-4 abandonment)

Activity handouts

Handout	Day · Activity	What it is
working-backwards-vignettes	Day 2 · A1	Four vignettes to judge forward- vs backward-built — no answer key
sample-personas	Day 3 · A1	Three personas (Diana / Rita / Tom) to triage — spoiler-free
persona-validation-canvas	Day 3 · A2	Blank 6-box persona canvas with evidence-tier columns + 3 validation circles
ride-along-field-note	Day 3 · A2	Maria's Tuesday shift — timestamped observed behaviors
dispatcher-character-cards	Day 3 · A3	Maria / Trey / Susana role-play cards (Public surface + interviewee-only Hidden)
pain-point-severity-matrix	Day 4 · A2	Printable Severity × Frequency grid + Addressability color key
problem-statement-template	Day 5 · A1	Who / Currently / Which causes / Because / Evidence / Success template
evidence-brief-template	Day 5	Persona → pain map → problem statement → evidence log → open questions
readout-score-sheet	Day 5	Cohort scoring rubric + per-triad score sheet for the Friday readout

Design principle: these handouts *provide evidence, not conclusions* — they deliberately do not diagnose pains, rank problems, or propose features; surfacing and scoring those is the participants' work. Characters, numbers, and product facts stay consistent across all of them so cross-referencing (a quote against a ticket against the funnel) is a valid exercise.
