

Week 4 Handouts — Technical Architecture & Constraints

Participant-facing handouts for Week 4. Each is a standalone card, pack, or template — distribute (print or share) before the day and activity that uses it. Templates and cards are meant to be filled in; the triage-pack answer keys stay in the facilitator lab files, not here.

Handout	Day · Activity	What it is
architecture-vocabulary-card	Day 1	7-term monolith/microservice vocabulary + the three-question frame
mono-micro-triage-pack	Day 1 · A1	8 anonymized scenario cards to stance-stamp — no answers
stance-stamp-sheet	Day 1 · A1	The 4 stances + fillable grid for the 8 cards
integration-table-template	Day 1 · A3	5-column integration table (system / owner / sync-async / R-W / failure)
stride-letter-card	Day 2 · A1	The six STRIDE letters + the data-flow lens
threat-documentation-template	Day 2 · A2	Per-threat template + top-5 roll-up
compliance-frame-cards	Day 2 · A3	Three frame cards (SOC 2 / Privacy / Industry) with fillable checks
security-brief-template	Day 2 · A4	One-page security brief + questions/pushbacks prep
c4-legend-card	Day 3 · A1–A2	C4 legend + Context/Container diagram rules
three-lens-prompt-card	Day 3 · A3	Failure / trust-boundary / evolvability review lenses
slo-triage-pack	Day 4 · A1	8 SLO statements to triage + failure-mode table — no answers
latency-budget-reference-card	Day 4 · A3	Per-hop latency ranges, the walk, and a worked example
tradeoff-template	Day 5 · A2	Trade-off template + 5 categories + FieldPulse worked examples

Design principle: these are working surfaces, not narration. The mono/micro and SLO triage packs are deliberately spoiler-free — the judging is the work.
