

DP Integration Checklist

Day 5 · Activity 2 handout. Read the full DP top to bottom and check coherence across sections before it goes into Friday's review. Fix coherence first, then prose.

Each row is a coherence check between two sections of the Delivery Plan. Walk them in order; mark pass/fail; fix the failures.

Check	Pass criterion	Pass?
Section 1 outcomes ↔ Section 2 backlog	Every output in Section 2 maps to an outcome in Section 1	☐
Section 2 backlog ↔ Section 3 tracking	Every leading indicator in Section 3 corresponds to backlog items	☐
Section 3 tracking ↔ Section 4 VSM	Cycle-time leading indicators are consistent with VSM measurements	☐
Section 4 queues ↔ Section 5 experiments	Every top queue has at least one experiment	☐
References to PRD/TCD/TMD/SEP	DP cites prior artifacts by section	☐
No fortune-cookie prose	Specific to this feature	☐

Integration protocol

1. **Solo read-through** (15 min). Each member reads Sections 1–5; marks issues in the margins.
2. **Pool issues** (10 min). De-dupe.
3. **Fix in priority order** (15 min). Coherence first, then prose.
