

Day 1 — AI Spec Development · Facilitator Guide

Companion to `labs/day-01-ai-spec-development.md` . Facilitator-only — do not hand to participants.

Activity 1 — Capstone Subject Confirmation

Cues:

- A subject that fails the "substantive enough" test will produce a thin capstone. Coach to a richer subject if needed.
- A subject lacking real customer signal often produces a fictional PRD. Push for at least one real interview (even a 15-min phone call).
- Capstone subject is the triad's choice — FieldPulse or an internal project. Either is fine; press instead on whether the problem is clearly stated and shippable in 4 days.

Activity 3 — Run the 5-Prompt Sequence on FieldPulse

Cues:

- Watch for triads who want to run all 5 prompts in parallel, separately. Force the sequence — each prompt builds on the prior validation.
- The validation step gets skipped under time pressure. Hold the discipline.
- The provenance log is mandatory. If a triad ships an AI Spec without it, they ship fiction.

Facilitator reflection prompts (end of day)

- Which triad's capstone subject is sharpest? Hold up Friday.
- Did anyone refuse to validate prompt outputs? Coach immediately — AI Spec without validation is fiction.
- Did anyone pick a subject that failed the 5-question fit test and not adjust? Pre-coach tomorrow morning.

- Did the practice run on FieldPulse produce a usable AI Spec? Reading skill is the test.
